

Iceberg	Sea	Cape	Forest
A large piece of floating ice that has broken off from a glacier.	A large body of salt water that covers almost three fourths of the earth's surface; ocean.	A piece of land that sticks out from the coastline into the sea or a lake.	A lot of trees and plants covering a large area of land ; woods.
Basin	Bay	Lake	Hill
All the land drained by a river and by all the streams flowing into the river.	A part of an ocean or lake partly enclosed by the coastline.	A body of water surrounded by land and larger than a pond.	A raised, rounded part of the earth's surface.
Valley	Waterfall	Plain	Prairie
An area of low land between hills or mountains.	A natural stream of water falling from a high place.	An area of flat or almost flat land.	Flat or rolling land covered with grass with few or no trees.
Rainforest	Jungle	Swamp	Beach
A dense forest that receives a large amount of rain during the year.	Land in tropical areas that is covered with a thick mass of trees, vines, and bushes.	An area of wet land. May have trees and shrubs growing in them.	The land along the edge of a body of water and covered with sand or pebbles.
Sound	Marsh	Isthmus	Ocean
A long, narrow passage of water between two larger bodies of water or between the mainland and an island.	Low, wet land. Grasses and reeds grow here.	A narrow strip of land that connects two larger land areas and has water on two sides. North and South America are connected by this.	The whole body of salt water that covers nearly three fourths of the earth's surface.
Lagoon	Atoll	Peninsula	Island
A shallow body of water usually connected to a larger body of water.	A coral island or strong of coral islands that surrounds a lagoon.	A piece of land that sticks out into water from a larger body of land.	A body of land that is completely surrounded by water, but smaller than a continent.
Archipelago	Channel	Coast	Cliff

A large group of islands.	The deepest part of a river, harbor, or other waterway.	The land next to the sea; seashore.	A high, steep face of rock or earth.
Strait	Dune	Gulf	Delta
A narrow channel between two larger bodies of water.	A mound or ridge of sand that has been piled up by the wind.	A part of an oceans or sea partly enclosed by land and usually larger and deeper than a bay.	An area of land at the mouth of a river. It is formed by deposits of mud, sand and pebbles.
Mesa	River	Cave	Oasis
A hill or mountain with a flat top and steep sides.	A large natural stream of water that empties into a lake, ocean, or other river.	A natural hollow or hole in the ground or in the side of a mountain.	A place in a desert where trees and other plants can grow because there is water.
Canyon	Desert	Plateau	Geyser
A deep valley with very high steep sides.	A hot, dry, sandy area of land with few or no plants growing on it.	An area of flat land higher than the surrounding country.	A hot, underground spring from which steam and hot water shoot into the air.
Tundra	Butte	Fjord	Mountain
A huge plain with no trees that lies in arctic regions.	A mountain or hill that stands alone.	A long, narrow inlet of the sea between high cliffs.	A mass of land that rises very high above the surrounding area.
Glacier	Volcano		
A large mass of ice in very cold regions or on the tops of very high mountains.	An opening in the surface of the earth through which lava, gases, and ashes are forced out.
